- Other Applicant Requirements: Class rank
  Although clerkships or visits are not requirements, they are usually helpful

AVAILABLE RESOURCES
- Sample Contract: At CRIP
- Benefit Package: Contact Program
- Curriculum: At CRIP

PROGRAM OVERVIEW
This program is a high powered three year surgical residency program designed to train residents to become fully competent in all aspects of foot and ankle surgery. The program is designed to provide a complete and intense surgical, clinical, and medical experience for the podiatric resident. Residents will have a unique opportunity to see a high volume of complex foot and ankle pathology in a large multidisciplinary setting. This program is seeking the most motivated and talented students. Strong emphasis is placed on resident research, academics, and an exemplary work ethic combined with hands-on training to develop future leaders in the profession. The program was reviewed by CPME on March 2014 and recommended for credentialing as a PMSR with the RRA credential. The first year of training is conducted primarily at Kaiser Oakland in tandem with other interns from various disciplines. During the second and third years of training, the resident spends four-month blocks in the Departments of Foot & Ankle Surgery at Kaiser Oakland, Walnut Creek/Antioch, and San Francisco.
