Program Overview

This well established, long running medical & surgical program prepares the podiatric resident for all aspects of future podiatric practice. Extensive exposure to pre-op and post-op surgical podiatry, general practice, wound care, practice management, hospital protocols, community service and inter-professional relations are obtained over the three year training program. The program is currently forefoot only. The required CPME clinical experiences are also presented via our medical and podiatric attending faculty members. This program will be a three year commitment.
