**PROGRAM OVERVIEW**

The Podiatric Residency Program is well integrated into the teaching hospital system. This program is designed for the self-motivated candidate who is eager to maximize their learning opportunities. Residents cover six hospitals, eight surgical facilities and 140 podiatric attendings. Clinical and surgical experience covers all aspect of foot and ankle pathology. Four resident foot and ankle clinics as well as multiple private offices are available for clinical podiatric experiences. Residents are expected to participate in the publications and lectures. There are over 1,100 residents and fellows being trained at the DMC. All rotations are coordinated with those of other specialties, and as such our residents are expected to function as equals to the allopathic residents. Our Orthopedic Trauma rotation (Level 1 trauma center), Pediatric Orthopedic Surgery rotation, Medicine, Vascular surgery and General surgery rotations are particularly strong and will provide the resident with dramatic increases in their knowledge, skills and confidence.
