PROGRAM OVERVIEW

Candidates interested in obtaining advanced rear foot trauma, orthoplastic and reconstructive training in hospital environment are encouraged to apply. The CLE VA serves as the primary referral site for all urgent, emergent, and complex foot and ankle pathology resulting in high volume Ex Fix, TAR, orthoplastic, 3-D technology, arthroscopic and various deformity correction procedures. The podiatry service is staffed by a large dedicated group of teaching faculty trained in comprehensive medical and surgical care. Residents rotate through a private practice office as well as non-VA hospitals and surgery centers for increased surgical exposure, particularly in the areas of pediatric and elective forefoot cases. There is a well-developed comprehensive didactic program in place to encourage academic growth and research while assisting with medicine and surgery board preparation. ABPM and ABFAS in-training exams are provided every year at no expense. This program is dynamic, challenging and well rounded resulting in highly competitive comprehensive lower extremity training.
