PROGRAM OVERVIEW

Our institution offers a well-rounded reconstructive, podiatric medical/surgical program. The residents cover the Wound Center and the Lower Extremity Fellow Clinic weekly, which offers continuity of patient care from the ER, to inpatient and also outpatient. Podiatry takes all ER foot and ankle trauma call, year round. The residents will gain experience handling forefoot, rearfoot and ankle trauma, both in the ER and in the OR. The residents will also manage complex Charcot foot and ankle reconstruction with the use of external ring fixation. We perform total ankle replacements at our facility. Basic and advanced reconstructive foot and ankle courses including internal and external fixation, limb salvage and practice management will be provided to the residents. The residents cover three hospitals and two surgery centers. The program offers a \$3000 per year stipend per resident, per year, for CME/Course Education. Clinical experience in podiatric reconstruction, orthopedic trauma, vascular surgery, and plastic limb salvage will be ongoing through all three years of training.
