PROGRAM OVERVIEW

The PM&S-24 program offers the resident the medical, biomechanical and surgical skills necessary to treat the foot and ankle. The first year concentrates on the medical and biomechanical management of the foot and ankle with a concentration in diabetic limb salvage surgery. The second year offers the resident a wide variety of elective surgical opportunities in surrounding community hospitals and surgical centers. There is a strong didactic lecture series with presentations and surgical workshops. The residents intergrate into several training experiences with the surgical and medical residents from the Penn State Milton S. Hershey Medical School on the University Service. The facility offers its employees both a fully equipped fitness center and a convenient day care center on the premises. The hospital is located in a family-oriented community with excellent outdoor recreational activities.
