PROGRAM OVERVIEW

Our 36 month program sponsors 6 residents; two per year for three years. During the first year, residents train with attending podiatry and medical physicians who provide education, supervision and performance assessment. While rotating in other specialty services, the residents make frequent inpatient rounds with the healthcare team, attend that service's educational conferences, supplemented by conferences held by the Division of Podiatry. In year two of training, the residents become actively involved in podiatric surgery, focusing on the performance of foot surgery and exposure to reconstructive surgery of the foot and ankle. Emphasis during year three of training is placed on reconstructive foot and ankle surgery, inclusive of surgical management of traumatology. By completion of the podiatric surgical training experience, the resident will be competent in the performance of all types of foot surgery as well as reconstructive foot and ankle surgery inclusive of major tarsal and ankle arthrodeses, osteotomies, fracture repair, and soft tissue repair.
